PRODUCT DATA SHEET

2Way Points System

90 Degree Motorised

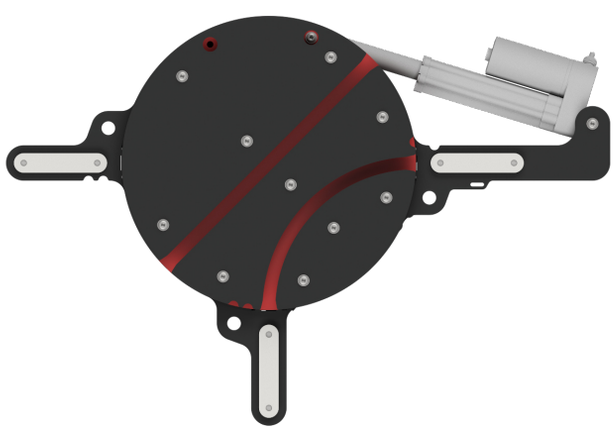

Technical Details

Part No: 2W9002

Weight: 13.5 kg
WLL: 88 kg

Material: Mild Steel & Electrical components
Finish: Black Powder Coated

We are excited to introduce our newly upgraded 2Way Track Motorised Points System, designed with both convenience and efficiency in mind.

Building on the solid foundations of our previous system, the reversible plate work has been modified to allow for quick and easy orientation changes. With just a simple plate rotation and minimal tools, the unit can effortlessly switch between a left or right-handed configuration, making it ideal for a wide variety of applications.

The addition of limit switches improves the system's precision and reliability, ensuring an even more accurate performance. The redesigned system is also now easier to install, saving both time and effort during setup.

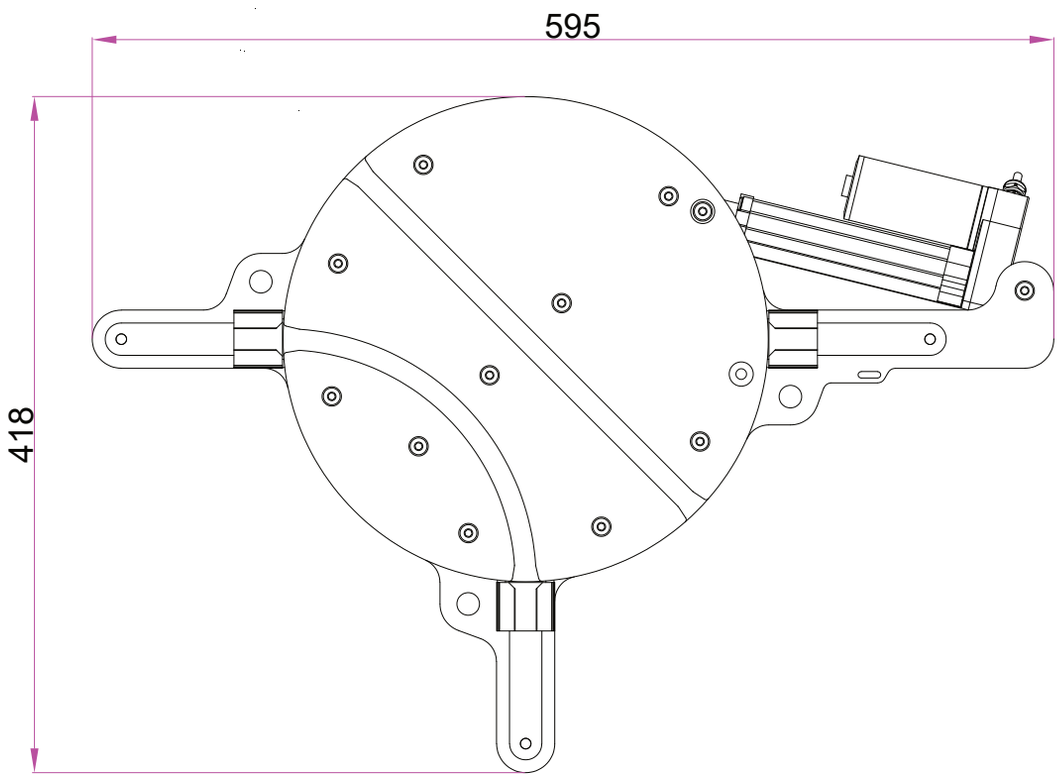

Our Points Systems come with a number of mechanical features which include:

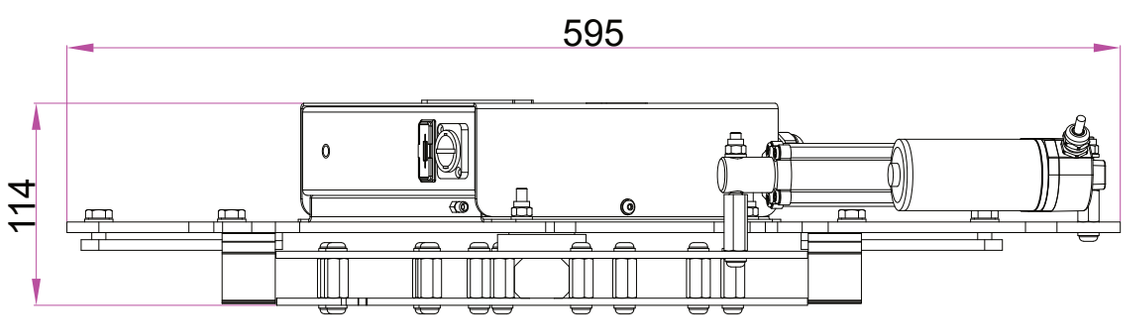

- Precise and controlled positioning with a 12 V DC linear actuator with movement controlled by limit switches for reliable, consistent performance.
- Fail safe operation with no possibility of running drapes off the track at open points.
- Matches 2Way's 88 kg UDL when supported on all three points so you don't need to worry about the size of your curtains when using the Points System.
- Mounting the point system can be achieved with ERL1702 suspension brackets or direct to track M8 studding.
