

Erail Deadline Fixing

Technical Details

Part No: ERL1501

Weight: 0.544 kg

WLL: 150 kg

Material: Mild Steel

Finish: Bright Zinc Plated

The ERL1501 is used to suspend Erail or 2Way sections by rope cordage or wire rope. It comprises of a forged fitting and threaded M12 bush with a solid tubular loop springing from the top outer edges of the bush. The fitting is then connected to a top hat bracket which has channel nuts at either end to fix it to the Erail track.
